

HUSBAND TIRED OF SEEING HER SUFFER

Procured Lydia E. Pinkham's
Vegetable Compound,
which made His Wife
a Well Woman.

Middletown, Pa.—"I had headache, backache and such awful bearing down pains that I could not be on my feet at times and I had organic inflammation so badly that I was not able to do my work. I could not get a good meal for my husband and one child. My neighbors said they thought my suffering was terrible."

"My husband got tired of seeing me suffer and one night went to the drug store and got me a bottle of Lydia E. Pinkham's Vegetable Compound and told me I must take it. I can't tell you all I suffered and I can't tell you all that your medicine has done for me. I was greatly benefited from the first and it has made me a well woman. I can do all my housework and even helped some of my friends as well. I think it is a wonderful help to all suffering women. I have got several to take it after seeing what it has done for me."—Mrs. EMMA ESPENSHADE, 219 East Main St., Middletown, Pa.

The Pinkham record is a proud and honorable one. It is a record of constant victory over the obstinate ills of woman—ills that deal out despair. It is an established fact that Lydia E. Pinkham's Vegetable Compound has restored health to thousands of such suffering women. Why don't you try it if you need such a medicine?

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

AMERICAN IDEA.

The American—What's your father's business?
The Englishman—My aw-fathaw-haw-aw-no business.
The American—Then what's his graft.

In the Day of the Billionaire.
A brilliant New York lawyer said at a dinner at the Lotus Club apropos of certain trust magnates:

"Thanks to watered stock—and watered stock is criminal abroad—these men are indeed rich beyond the dreams of avarice."

"If the watering of stock is allowed to keep on we'll hear our billionaires talking like this some day."

"Hullo! There goes Jones in his 300 horsepower car. Do you know him?"

"Do I know him! Do I know Jones! Why, man alive, Jones and I were struggling young millionaires together!"—New York Times.

Usually when a girl meets a man she likes on the street by accident it isn't an accident at all.

Ready Cooked Meals

are rapidly growing in popular favor.

Post Toasties

served either with cream or good milk, or preserved fruit, make a most appetizing dish for breakfast, dinner, or supper.

These delicious toasted flaky bits of white corn have a delicate taste that is very pleasing at this time of year.

Post Toasties are economical, make less work for the busy housewife and please everyone at the table.

Sold by Grocers everywhere

Postum Cereal Co., Ltd.,
Battle Creek, Mich.

CLUBS OF LONDON

Aristocratic Resorts on Piccadilly Street Are Passing.

Grounds Upon Which They Are Situated Are Now Too Valuable for Purpose—Old Organizations Seeking New Locations.

London.—The most famous street of clubs in the world is likely before long to lose its character. The utilitarianism—sometimes described as Americanism—which introduced ice and electric subways into London's daily life, has decreed that Piccadilly shall no longer be sacrosanct to clubs. They will have to look for other quarters.

In the very heart of clubland a large hotel will shortly be built. Negotiations are in progress to acquire other sites in Piccadilly for similar purposes. Theatrical managers, even picture show proprietors, are casting envious eyes upon stately houses, when in the old days the "three bottle" men were bundled decorously into horse cabs and sent on their drunken way rejoicing. The leases under which the older clubs secured their premises are expiring—most of them are, according to English custom, for ninety-nine years.

The majority of the Piccadilly clubs only pay a mere song for their homes. In some cases the original owner of the property was a member of the club and leased the land or building for a "peppercorn," or nominal sum, to his own organization. Such descendants of these generous folk as Sir Richard Sutton, who owns a good deal of the land, look at the matter in a different light. The value of Piccadilly sites is about \$50 per square foot. By evicting a club the owner of the property in question automatically acquires a small fortune, either by building himself or renting to some enterprising hotel, store or theater.

The subordination of the picturesque to the utilitarian in Piccadilly will probably be complete within the next ten years. The trend of business and of traffic in London today is toward the West End. Centers half way between west and east, which formerly surged nightly with crowds, are now deserted. At the moment the Ritz and Berkeley hotels, which stand half way between Piccadilly Circus and Hyde Park, mark the limit of the hotel man's daring. Up till now he has not encroached upon the row of clubs, the Rothschild houses and that part of Piccadilly between Bond street and Hyde Park which ends in the grim mansion where the great Duke of

Cavalry Club, London.

Wellington was stormed by a furious mob. The wedge has been driven in, and the scaffolding, which announces the erection of the new hotel, sounds the death knell of Piccadilly as the world's greatest street of clubs.

The older clubs will be hard put to find new quarters commensurate with their dignity. Instead of looking out upon a really magnificent park—the section of Piccadilly I refer to is and can be only built on one side of the street—they will have to retreat to quieter streets, where the outlook only is likely to be other people's windows. Even here they will find it hard to pay the necessary rent. There is some talk of turning Dorchester House, rented by Whitelaw Reid, and the Stafford and Spencer houses into clubs, but this would probably prove too expensive. Since the advent of the fashionable hotel restaurant the popularity of club life has steadily declined. With a few notable exceptions, the average London club is in rather low water financially. The old days of waiting ten years or more for election have departed. Two or three old clubs have broken up and others have amalgamated.

MAN OF 104 AS STUDENT

Veteran North Dakota Farmer Enrolls as Pupil of Corn and Clover Convention.

Grand Forks, S. D.—William Huggins, one hundred and four years old, has enrolled as one of the students at the North Dakota corn and clover convention, to be held at Grand Forks soon. Mr. Huggins is a pioneer of this state, having come here from Canada many years ago. He is interested in diversified farming and says "a young man should always keep up with the times."

Will Warn Mine Owners.
Pittsburg.—The local weather bureau is inaugurating a system of warning mine operators of anticipated marked decreases in the barometric pressure, it having been shown that low pressure increases the chances of explosions.

JUST WHAT HENS EAT

Meat Is Usually in Form of Bugs and Worms.

Considerable Studying and Experimenting Necessary to Find Out What Fowls Need and How Much They Should Have.

(By KATHERINE ATHERTON GRIMES.)

The hen has three reasons for eating: to repair the tissues of her body, to keep herself warm, and to make eggs. It therefore follows that her diet must be varied and plentiful.

If we open the crop of a hen that has been allowed to eat just what she pleased we will find that she has provided herself with three kinds of food—grain, green stuff and meat. The last named is usually in the form of bugs and worms.

We must, then, furnish our hens with food of these classes. Moreover, the quantity must be about right of each. If they are not given enough, they will have to use it all for body building and heat production, and will have nothing left over to make eggs with. If we feed too much of some kinds the surplus will go to fat, and the hens will get too lazy to lay.

It takes considerable studying and experimenting to find out just what the hens need, and how much they ought to have, but we must learn as soon as we can, or we will find our

Oats sprouted to supply green food when none is growing in the open. The arrangement of the trays shows sowing at week intervals. Then trays can be slipped out and placed in the poultry house as needed.

poultry is not so profitable as it ought to be. The feeding question is one of the most important in the whole poultry business.

Experts tell us that a hen needs about six ounces of food a day. A flock of ten, then, will need about three and three-fourths pounds a day, or a trifle over twenty-six pounds a week.

Of this amount two-thirds by weight should consist of grains. The grain should be a mixture of equal parts of wheat, cracked corn and oats. A few handfuls of sunflower seed, cane seed or buckwheat should be added for variety. They are to the hen what pie is to the boy—and you know what that is.

The other third should be a "mash," which is a mixture of bran and other finely ground feeds, usually fed dry. Some poultrymen moisten the mash, but the majority claim that it is better to feed it dry, and let the hen moisten it in her crop by drinking what water she wants. If fed dry there is less danger from certain kinds of disease.

A good formula for a mash is as follows: One-half bushel of bran, 4 quarts alfalfa meal, 2 quarts each of ground oats and corn meal, 1 tablespoonful of charcoal, 1 pint of beef scrap, 1 tablespoonful of salt and 1 teaspoonful of pepper.

This furnishes both meat and green food in about the right quantities. Where these elements are given in other ways the alfalfa meal and beef scrap may be omitted from the mash. These ingredients should be thoroughly mixed together, and the mash kept where the hens can get it any time they want it. It is a bulky food, but not a fattening one, so there is no danger of their eating too much. The bran is one of the best "conditioning" powders poultry can have. It keeps the system vigorous and healthy and furnishes a large part of the egg-making elements.

The grain food should always be thrown into a deep little of straw or chaff, where the birds will have to "scratch for a living." If you have ever watched an old hen digging about in the yard you will know that it is as natural for her to dig as it is to breathe.

Grit and lime, usually given in the form of oyster shells, are two other necessary elements. They should be kept before the fowls all the time. A very convenient hopper for feeding the mash, grit and shells may be made like the illustration, the compartment for the mash being much larger than the others.

WHY CAT HAS NINE LIVES

Has Ceased to Be a Question to This Official Cat and Dog Executioner.

New London, Conn.—Why a cat has nine lives ceases to be a question. The presence of electricity explains it.

This important contribution to scientific knowledge is made by Herbert A. Dean of Providence, who holds the delightful job of official cat and dog executioner in Providence and New London.

He has cut short the careers of numerous dogs here by asphyxiation in a large tank. None of them gave Dean a bit of trouble.

Several months ago he placed a cat in the gas tank and turned on the fumes. Within a few minutes the tank exploded, almost consigning Dean and his assistant, Earl Brown, to the fate decided on for the cat.

Dean thought that was just an ordinary accident, but the other day when a second cat was tossed in to the tank, the death chamber blew up again. Brown was slightly injured and Dean's hair was singed. What remains of the tank will never form a topic of conversation.

Dean, seeking an explanation, went to the office of the New London Gas and Electric Company and told his story. One of the officials laughed and said that when a cat is thrown into the tank the feline arches its back and by rubbing the same against the side of the tank generates so much electricity that an explosion is inevitable.

The gas expert said that this was so because one of his engineers who had looked into the thing said it was so.

Awful Blow.

"Yes," said Slithers, "Mickey was my dearest friend, and I shall never cease to mourn his death. It was a terrible blow from which I shall never recover."

"Why—I thought you married his widow?" said Jimpson.

"Why—er—ahem!—why, yes, I did; but—"

Here Slithers subsided into a deep and uncomfortable silence.—Harper's Weekly.

Burduco Liver Powder.

Nature's remedy for biliousness, constipation, indigestion and all stomach diseases. A vegetable preparation, better than calomel and will not salivate. In screw top cans at 25c each. Burwell & Dunn Co., Mfrs., Charlotte, N. C. Adv.

Loyal to Her Teacher.

Sunday School Teacher—Yes, children, the Lord made everybody. Small Girl—Did he make you, teacher?

Teacher—Yes. He made me, too. Small Girl—And he's got nothin' to be ashamed of, either.

Important to Mothers.

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher*. In Use For Over 30 Years. Children Cry for Fletcher's Castoria

Some Measure of Love Important.

It is best to love wisely, no doubt; but to love foolishly is better than not to be able to love at all.—Thackeray.

FOR WEAKNESS AND LOSS OF APPETITE.

The Old Standard strengthening tonic, GROVER'S FAST-LESSLER chili TONIC drives out malaria and builds up the system. A true tonic and sure Appetizer. For adults and children. 50 cents.

The average man has a lot more to say about what he is going to do than about what he has done.

Not Unlikely.

"Well, my boy," said the visitor to Bobby, "I suppose some day you expect to step into your father's shoes?" "Oh, I suppose so," said Bobby, gloomily. "I been wearin' out everythin' else he wears since mother learned how to cut 'em down for me."—Harper's Weekly.

Only One "BROMO QUININE"

That is LAXATIVE BROMO QUININE. Look for the signature of R. W. GROVE. Cures a Cold in One Day, Cures Grip in Two Days. 25c.

Figuratively speaking, a man and his wife are one, but the figures on the grocery bill are apt to disprove it.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 35c a bottle.

Distance never lends enchantment to the office seeker's view.

CONSTIPATION

Munyon's Paw-Paw Pills are unlike all other laxatives or cathartics. They coax the liver into activity by gentle methods, they do not scour; they do not gripe; they do not weaken; but they do start all the secretions of the liver and stomach in a way that soon puts these organs in a healthy condition and corrects constipation. Munyon's Paw-Paw Pills are a tonic to the stomach, liver and nerves. They invigorate instead of weaken; they enrich the blood instead of impoverishing it; they enable the stomach to get all the nourishment from food that is put into it. Price 25 cents. All Druggists.

and often require lime as well as phosphate. The crop takes from the soil two and one-half times as much Potash as phosphoric acid. The best growers who use raw materials to fertilize the crop use them in about this proportion. It is plain that any mixed fertilizer for peanuts should contain more Potash than phosphoric acid. The use of 100 lbs. Murate of Potash or 400 lbs. Kanit per acre, or 500 lbs. of fertilizer with 10 per cent. Potash, would furnish two-thirds as much Potash as a 100-bushel crop removes. You can afford to feed this crop well—also to feed it right. If your dealer does not carry this kind of goods, write us for prices of Potash salts in any quantity from 200 lbs. up, and for our free book on fertilizer formulas.

Don't Let Catarrh Get the Best of You

If you have catarrh and are neglecting it—you are doing a great wrong to yourself. In time it will undermine your whole constitution. You cannot begin too soon the work of shaking it off. Doesn't require any great effort. Begin today.

"I Feel Like a New Woman"

Mrs. BERN BLAKE, of Port Dover, Ont., writes: "I have been a great sufferer for years from throat trouble, catarrh, indigestion, female troubles, bloating, constipation and nervousness—at times I would be in bed, then able to be up again. I was under many different doctors' care, and would get better for a little while, then I would go down with chronic inflammation all through me. For nineteen years I had this poison in my blood. After trying nearly everything I got worse. I read in The People's Common Sense Medical Adviser of Dr. Pierce's Golden Medical Discovery and Dr. Sage's Catarrh Remedy. I have taken the 'Golden Medical Discovery' and 'Pleasant Pellets,' and have used five bottles of Dr. Sage's Catarrh Remedy. I am now able to do my work and walk with pleasure. I feel like a new woman. I enjoy everything around me and thank God for letting me live long enough to find something that made me well again."

Dr. Pierce's Golden Medical Discovery

has a curative effect upon all mucous surfaces, and hence removes catarrh. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy while using the "Discovery" as a constitutional remedy.

Why the "Golden Medical Discovery" eradicates catarrhal affections, of the stomach, bowels, bladder and other pelvic organs, will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities endorsing its ingredients and explaining their curative properties. It is mailed free on request.

"The 'Discovery' has been put up and sold in its liquid form for over 40 years and has given great satisfaction. Now it can be obtained of medicine dealers in tablet form as well. A trial box sent prepaid for 50 one-cent stamps. Address Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels. Assist nature a little, now and then, with a searching and cleansing, yet gentle cathartic, and thereby avoid many diseases.
